

We May Use AI Scribes to Support Your Care

At Hospice Georgian Triangle, some of our physicians are now using AI-powered medical scribes to help document visits more efficiently and accurately.

What Is an AI Scribe? An AI scribe is a digital tool that listens during your visit and helps generate a summary of the conversation between you and your physician. The physician reviews and approves the summary before it becomes part of your medical record. These tools do not make decisions about your care—they simply support clear and complete documentation.

Why Are We Using AI Scribes? AI scribes allow physicians to spend more time focused on you and less time on note-taking. They also help ensure that important information about your health is recorded accurately.

Privacy and Security Hospice Georgian Triangle has carefully reviewed and approved all AI scribe tools in use. Physicians must follow Ontario's privacy laws and our internal privacy policies to protect your personal health information.

Are There Any Risks? As with any technology, errors in how information is captured can occasionally occur. Your physician is responsible for reviewing and confirming all notes for accuracy. Hospice Georgian Triangle has safeguards in place to protect your personal information and prevent unauthorized access.

Participation Is Your Choice. Using an AI scribe during your visit is completely optional. If your physician is participating, they will explain how the tool works and ask for your permission. You may decline or change your mind at any time. This will not affect the care you receive.

Have Questions? We're here to help. If you have questions or concerns, please speak with your care team or contact the Privacy Coordinator at privacy@gbfht.ca. To access your health records, please speak with a member of your care team.
